

Now with EcoTech™

Enhanced engineering technology
for performance and sustainability

Our trusted & original RhinoBoard® now with enhanced engineering technology that is manufactured efficiently and with sustainability in mind.

Performance

Delivering a sustainable board that provides the trusted breaking strength

Sustainability

Efficiently produced, using less energy, less water & less waste

Site-Efficiency

It has been made easier to lift, with a trusted flex due to its optimized core

Usability

It is easy to install giving crisper edges, cleaner cuts, improved snaps & an easier fix

Transport Efficiency

An optimized board giving more m² per load – optimization of pallets to customer

PRODUCTION -
Producing products and systems responsibly

TRANSPORT & LOGISTICS -
Minimising CO² emissions related to the transportation of our products

RAW MATERIALS -
Limiting our impact on natural resources

NET ZERO CARBON

WORLDWIDE LEADERS IN LIGHT AND SUSTAINABLE CONSTRUCTION COMMITTED TO ACHIEVE CARBON NEUTRALITY BY 2050

USE & LIFE OF BUILDINGS -
Improving the comfort, health and safety of the occupants

CONSTRUCTION & INSTALLATION -
Facilitating the installation of products & reducing waste on the job-site
